**CENTRAL DEPARTMENT OF HYDROLOGY AND METEOROLOGY**  
**TEACHING PLAN**

<b>Institute:</b>	Institute of Science and Technology (IOST)	<b>Department:</b>	Central Department of Hydrology and Meteorology (CDHM)
<b>Level:</b>	M.Sc.	<b>Year/Semester:</b>	III
<b>Subject:</b>	Paleoclimatology ( Dendrochronology)	<b>Course No.:</b>	Hymet 603
<b>FullMarks:</b>	50 (25)	<b>Total Period:</b>	30 lecture hours (15 dendro)

**Detail Plan of Action for Course Facilitation**

<b>Class/ Period</b>	<b>Chapter/ Unit</b>	<b>Learning Outcomes of the Chapter/Unit</b>	<b>Major Components</b>	<b>Description/Particulars</b>	<b>Remarks</b>
3 Class hours	Introduction	Student will be able to understand tree ring formation, how climate influence tree ring, history of dendro and various statistical parameters used in dendro study	<b>Contents</b>	<b>Introduction of dendrochronology</b>	
			<b>Objectives</b>	Define of tree rings, various tree rings and correlation with temperature and precipitation, ringswidth chronology, relationships between various climatic parameters, definition of various statistical parameters used in tree ring chronology	
			<b>Teaching Methods</b>	Didactic questioning, Short lecturing, Peer teaching, Discussion, Audiovisual,	
			<b>Materials</b>	Whiteboard and marker, Multimedia projector, Laptop with ppt	

<b>Class/ Period</b>	<b>Chapter/ Unit</b>	<b>Learning Outcomes of the Chapter/Unit</b>	<b>Major Components</b>	<b>Description/Particulars</b>	<b>Remarks</b>
			<b>Evaluation</b>	History of dendrochronology, What is dendrochronology? How tree ring width is controlled by climate ?	
3  Class hours	Tree ring sampling	Student will be able to know how to get tree ring samples from field for dendroclimatic study	<b>Content</b>	<b>Tree ring sampling:</b>	
			<b>Objective</b>	To make familiar about the tree ring sampling techniques	
			<b>Teaching Methods</b>	Didactic questioning, Short lecturing, Peer teaching, Discussion, Audiovisual and demonstration.	
			<b>Materials</b>	Whiteboard and marker, Multimedia projector, Laptop with ppt, increment borer.	
			<b>Evaluation</b>	Site selection and description, various methods of tree ring sampling, Description of tree ring instrument, types of borers/tree corer, definition of various statistic used in the study, the standard tree ring chronology, tree ring climate growth response	
4 Class hours	Lab measurement procedures:		<b>Content</b>	<b>How to measure the tree rings</b>	
			<b>Objective</b>	To make student familiar about the tree ring measurement techniques	
			<b>Teaching Methods</b>	Didactic questioning, Short lecturing, Peer teaching, Discussion, Audiovisual, and demonstration.	
			<b>Materials</b>	Whiteboard and marker, Multimedia projector, Laptop with ppt, dendro lab.	
			<b>Evaluation</b>	Instrumental procedure used in the lab, storing the tree ring samples, data recording, sample preparation and	

Class/ Period	Chapter/ Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars	Remarks
				dating methods, standardization and chronology construction	
5 Class hours	<b>Application of tree ring study in Meteorology</b>		<b>Content</b>	<b>Application of tree ring in Meteorology</b>	
			<b>Objective</b>	Shortout the important application of dendrochronology for meteorology (dendroclimatology,dendrohydrology etc)	
			<b>Teaching Methods</b>	Didactic questioning, Short lecturing, Peer teaching, Discussion, Audiovisual,	
			<b>Materials</b>	Whiteboard and marker, Multimedia projector, Laptop with ppt,	
			<b>Evaluation</b>	Relation of tree ring with temperature and other various parameters, drought and wet periods, spatial and temporal variation of tree ring climatology, long term variation of paleoclimatic condition	
15	Dendrochronology	<b>Learning Achievement:</b> At the end of the course, student will understand the importance of dendrochronology and its use for the paleo studies and able to handle the field and laboratory activities independently for paleoclimatological and paleohydrological studies			

Books:

Prescribed/ Basic Book

**Tree Rings and Climate:** H.C.FRITTS, ACADEMIC PRESS LONDON,NEWYORKS, AND FRANCISCO

Reference Books:

**Fundamentals of Tree ring Research:** James H. Speer, The University of Arizona Press.

**Dendroclimatology progress and prospect:**Edits Malcolm K. Hughes, Thomas W. Swetnam, Henry F. Diaz, Springer

<b>Full Marks:</b> 50	<b>Total Period:</b> 30

### Detail Plan of Action for Course Facilitation

Chapter/Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
e ry	Get information about the history of ozone layer from 1800's, till to future 2050's.	<b>Contents</b>	Historical background
		<b>Objectives</b>	The students will be able to – conceptualize the initiation of the Ozone layer and its studies by scientists at different periods ( <a href="#">ozone spectrophotometer</a> , <a href="#">chlorofluorocarbons</a> , <a href="#">Sydney Chapman theory</a> , <a href="#">Ozonesonde</a> , <a href="#">supersonic transport</a> )
		<b>Teaching Methods</b>	Questioning, Short lecturing, Discussion, and Skills practice
		<b>Materials</b>	White board and marker, Multimedia projector, Laptop with ppt,
		<b>Evaluation</b>	<ul style="list-style-type: none"> <li>• Which scientist invented ozone spectrophotometer for what purpose?</li> <li>• What are <a href="#">chlorofluorocarbons</a>?</li> <li>• <a href="#">What is supersonic transport?</a></li> </ul>
		<b>Learning Achievement</b>	<ul style="list-style-type: none"> <li>• Understand the history of ozone layer</li> <li>• List out the Outline of the history of ozone layer</li> </ul>
	<b>Prescribed/ Basic Book</b>	A Brief History of Ozone  <a href="https://www.albany.edu/faculty/rgk/atm101/o3histor.htm">https://www.albany.edu/faculty/rgk/atm101/o3histor.htm</a>  <a href="https://svs.gsfc.nasa.gov/11644">https://svs.gsfc.nasa.gov/11644</a>

<b>Subject:</b>	Atmospheric Chemistry	<b>Course No.:</b>	Hymet 601
<b>Full Marks:</b>	50	<b>Total Period:</b>	30

**Detail Plan of Action for Course Facilitation**

Chapter/ Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars	Re
Stratospheric ozone	Identify the catalytic loss cycle of Hydrogen oxide radicals (HOx)	<b>Contents</b>	Catalytic loss cycles	
		<b>Objectives</b>	The students will be able to –  conceptualize the constituents of hydrogen oxide radicals for formation and destruction	
		<b>Teaching Methods</b>	Didactic questioning, Short lecturing, Discussion, and Skills practice	
		<b>Materials</b>	White board and marker, Multimedia projector, Laptop with ppt,	
		<b>Evaluation</b>	A termination step for the HOx radical chain is $\text{HO}_2 + \text{HO}_2 \rightarrow \text{H}_2\text{O}_2$ (hydrogen peroxide) Hydrogen peroxide can go on to either photolyze or react with OH: $\text{H}_2\text{O}_2 + h\nu \rightarrow 2\text{OH}$ $\text{H}_2\text{O}_2 + \text{OH} \rightarrow \text{H}_2\text{O} + \text{HO}_2$ Whether $\text{H}_2\text{O}_2$ photolyzes or reacts with OH has a large effect on HOx-catalyzed ozone loss, explain why.	
		<b>Learning Achievement</b>	<ul style="list-style-type: none"> <li>• Understand the catalytic ozone loss by hydrogen oxide radicals</li> <li>• Write the chemical reaction of the catalytic loss by HOx radical</li> </ul>	
		<b>Prescribed/ Basic Book</b>	<a href="http://acmg.seas.harvard.edu/people/faculty/djj/book/bookchap10.html">Atmospheric Chemistry</a> <a href="http://acmg.seas.harvard.edu/people/faculty/djj/book/bookchap10.html">http://acmg.seas.harvard.edu/people/faculty/djj/book/bookchap10.html</a>

**Detail Plan of Action for Course Facilitation**

Chapter/Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
Atmospheric Chemistry	Identify the catalytic loss cycle of Nitrogen oxide radicals (NO <sub>x</sub> )	<b>Contents</b>	Catalytic loss cycles
		<b>Objectives</b>	The students will be able to –  conceptualize the constituents of Nitrogen oxide radicals (NO <sub>x</sub> ) for formation and destruction
		<b>Teaching Methods</b>	Didactic questioning, Short lecturing, Discussion, and Skills practice
		<b>Materials</b>	White board and marker, Multimedia projector, Laptop with ppt,
		<b>Evaluation</b>	N <sub>2</sub> O in the stratosphere can react by two alternate pathways: $N_2O + hv \rightarrow N_2 + O(1)$ and $N_2O + O(^1D) \rightarrow 2NO(2)$ Show that competition between (1) and (2) lends stability to the ozone layer, i.e., acts as a negative feedback to an ozone perturbation.
		<b>Learning Achievement</b>	<ul style="list-style-type: none"> <li>• Understand the catalytic ozone loss by Nitrogen oxide radicals</li> <li>• Write the chemical reaction of the catalytic loss by NO<sub>x</sub> radical</li> </ul>

<b>Subject:</b>	Fortran programming / Practical (Compulsory)	<b>Course No.:</b>	Hymet 507
<b>Full Marks:</b>		<b>Total Period:</b>	60 lecture hours (2 Hours per class, 2 class per week)

**Detail Plan of Action for Course Facilitation**

<b>Chapter/Unit</b>	<b>Learning Outcomes of the Chapter/Unit</b>	<b>Major Components</b>	<b>Description/Particulars</b>
	1. Introduction to computer Language	<b>Contents</b>	Computer Languages, The History of the Fortran Language, The Evolution of Fortran
		<b>Objectives</b>	1. Get an ideal of what computer language is. 2. Background of FORTRAN
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation.
		<b>Evaluation</b>	1. What is computer language? 2. What is f77, f90, f95 ?
		<b>Learning Achievement</b>	Introduction to computer language.
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education, 2018

Chapter/ Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
o	Basic Elements of Fortran	<b>Contents</b>	The Fortran Character Set, The Structure of a Fortran Program, Constants and Variables, Assignment Statements and Arithmetic Calculations, Intrinsic Functions, Initialization of Variables, The IMPLICIT NONE Statement, Program Examples
		<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. Introduction To FORTRAN</li> <li>2. Know basic elements of FORTRAN Language</li> </ol>
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation,
		<b>Evaluation</b>	<ol style="list-style-type: none"> <li>1. What are characters used in FORTRAN.</li> <li>2. What is Constant, variable?</li> <li>3. Write An arithmetic expression in FORTRAN code.</li> <li>4. What is intrinsic function?</li> <li>5. Write a basic FORTRAN code</li> </ol>
		<b>Learning Achievement</b>	Write basic FORTRN code.
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education,2018

Chapter/ Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
ree	1. Branch program using conditional arguments.	<b>Contents</b>	Introduction to Top-Down Design Techniques, Logical Constants, Variables, and Operators, The Block IF Construct, The ELSE and ELSE IF Clauses, The SELECT CASE Construct
		<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. Introduction To splitting program to section using arguments.</li> <li>2. Use logic to solve problems</li> </ol>
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation,

Chapter Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
		<b>Evaluation</b>	<ol style="list-style-type: none"> <li>1. What is a logical operator?</li> <li>2. Compare a number if it is even or odd.</li> <li>3. Write a code that uses ELSE IF Clauses.</li> </ol>
		<b>Learning Achievement</b>	Handle real time logical questions in code.
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education,2018

Chapter / Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
Four	Writing Piece of Codes For repeat ion , Loops	<b>Contents</b>	The While Loop, The DO WHILE Loop, The CYCLE and EXIT Statements, Named Loops , Nesting Loops and Block IF Constructs
		<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. Write codes that is used to handle repeated section.</li> <li>2. Learn different ways of writing the loop.</li> <li>3. Pass the control of the program in different sections in loop.</li> </ol>
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation,
		<b>Evaluation</b>	<ol style="list-style-type: none"> <li>1. Write a code to display a series of numbers from 1 to</li> <li>2. Write a code that uses Do loop.</li> <li>3. How to terminate While loop?</li> <li>4. Write a condition to exit from a loop.</li> </ol>
		<b>Learning Achievement</b>	<ol style="list-style-type: none"> <li>1. Know what loops are and when to use.</li> <li>2. Learn how to write program with loop.</li> </ol>
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education,2018

Chapter / Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
Fifth	Pass input / output through the components of computer	<b>Contents</b>	Formats and Formatted WRITE Statements, Formatted READ Statements, An Introduction to Files and File Processing
		<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. Write codes that handle different display patterns of a Real numbers, integers and character.</li> <li>2. Use different read and write techniques in Fortran.</li> <li>3. Pass content in and out of program using files.</li> </ol>
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation,
		<b>Evaluation</b>	<ol style="list-style-type: none"> <li>1. What is a way to represent real number with one decimal place?</li> <li>2. How to read a string of numbers?</li> <li>3. What is the meaning of OPEN statement?</li> <li>4. What is the meaning of CLOSE statement?</li> <li>5. How to Pass a file input in READ and WRITE statement?</li> </ol>
		<b>Learning Achievement</b>	<ol style="list-style-type: none"> <li>1. Use technique to format the numbers and characters.</li> <li>2. Handle files to give in input and give out output from a Program.</li> </ol>
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education, 2018

Chapter / Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
Sixth	Using Array as a sequence of number.	<b>Contents</b>	Declaring Arrays, Using Array Elements in Fortran Statements, Input and Output of Array Elements, 2D or Rank 2 Arrays, Multidimensional or Rank n Arrays, Allocatable Arrays
		<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. Learn what is an array.</li> <li>2. Write an array.</li> </ol>

Chapter / Unit	Learning Outcomes of the Chapter/Unit	Major Components	Description/Particulars
			3. Using an array of numbers. 4. Declare different dimension of array.
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation,
		<b>Evaluation</b>	1. What does the following lines designate integer, dimension(5) :: arr1  arr1 = (/1,2,3,4,5/)
		<b>Learning Achievement</b>	1. Write a sequence of numbers. 2. Manipulate a set of number. (Write and Read)
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education,2018

**Detail Plan of Action for Course Facilitation**

<b>Chapter/ Unit</b>	<b>Learning Outcomes of the Chapter/Unit</b>	<b>Major Components</b>	<b>Description/Particulars</b>
One	Use Sub programs  1. Function 2. Subroutine 3. Module	<b>Contents</b>	Subroutines, Module, Functions
		<b>Objectives</b>	1. How to code subprograms.
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation.
		<b>Evaluation</b>	1. Write a function to find cube root ? 2. What is a module, how to call it? 3. How to write a subroutine?
		<b>Learning Achievement</b>	Able to code function, subroutine, module.
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education, 2018

<b>Chapter/ Unit</b>	<b>Learning Outcomes of the Chapter/Unit</b>	<b>Major Components</b>	<b>Description/Particulars</b>
Two	Knowledge of derived types	<b>Contents</b>	Introduction to Derived Data Types, Declaring Derived Data Types in Modules, Dynamic Allocation of Derived Data Types
		<b>Objectives</b>	1. Use technique of Structure
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation.
		<b>Evaluation</b>	1. Declare a Derived type ( structure )?
		<b>Learning Achievement</b>	Introduction to a basic element of OOP.
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education,2018

<b>Chapter/ Unit</b>	<b>Learning Outcomes of the Chapter/Unit</b>	<b>Major Components</b>	<b>Description/Particulars</b>
Three	Project I  1. How to calculate ST.DEV  2. How to calculate Coeff of variation.	<b>Contents</b>	coefficient of variations using Daily precipitation data from all over Nepal
		<b>Objectives</b>	1. Work with Data 2. Write a code to for real case.
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation.
		<b>Evaluation</b>	1. Use the given code to calculate the coefficient of variations.
		<b>Learning Achievement</b>	Write some lines of code to do a real case study.
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education,2018

<b>Chapter/ Unit</b>	<b>Learning Outcomes of the Chapter/Unit</b>	<b>Major Components</b>	<b>Description/Particulars</b>
Three	Project II  1. How to calculate linear regression Write Code in Fortran as needed	<b>Contents</b>	linear trends for monthly, seasonal and annual distributions using Daily precipitation data from all over Nepal
		<b>Objectives</b>	1. Work with Data 2. Write a code for real case.
		<b>Teaching Methods</b>	lecturing, Discussion, solving errors for each students.
		<b>Materials</b>	White board and marker, Multimedia presentation.
		<b>Evaluation</b>	1. Use the given code to calculate the linear trends for monthly, seasonal and annual case.
		<b>Learning Achievement</b>	Write some lines of code to do a real case study.
		<b>Prescribed/ Basic Book</b>	Stephen J. Chapman, Fortran for Scientists and Engineers, Fourth Edition, McGraw-Hill Education, 2018

## Lesson Plan – 01

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Introduction</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	One

### Objectives:

At the end of the topic, students will be able to:

- Conceptualize the Course credit and total marks coverage
- Visualize the course of contents
- Describe the importance and scope of Cloud physics

### Resources:

- Computer with internet facility and presentation slides, White board and marker

### Activities:

- Attendance (5mins)
- Warmup the class with introducing each other's with sharing their aim and hobbies (10mins)
- Slide share and describe the overall course structures (10mins)
- Introduce the class about the course books and educational sites (5)
- Discussion on the importance and scope of cloud physics (10min)
- Address all the queries from students (10mins)

### Evaluation: (8mins)

- Ask questions to some selected students and evaluate their response;  
Q1. What do you think about the formation of cloud?  
Q2. How can you interpret the role of cloud to sustain Nepalese Agroecconomy.

### Assignment: (2min)

- Describe the importance of clouds in earth surface water budget?

### **Text Books and References:**

- Pruppacher H. R., and Klett, J.D., Microphysics of Clouds and Precipitation, Kluwer Academic Publishers, Netherland, 2000.
- Mason, B. J. The physics of clouds, Oxford University Press, 1971.
- Seinfeld John H. and Pandis Spyros N., Atmospheric Chemistry and Physics from air pollution to climate change, A Wiley-IntersciencePublication, 1997.
- Mason, B. J., Clouds and rain making, Cambridge University Press, 1962.
- WMO. (1969). International Cloud Atlas: Abridged Atlas. World Meteorological Organization.

Lesson Plan – 02

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Introduction</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	One

### **Objectives:**

At the end of the topic, students will be able to:

- Identify and explain the major 10 types of cloud based on their altitude and appearance
- Explain what clouds are made of and their role in weather

### **Resources:**

- Computer with internet facility and presentation slides, White board and marker

### **Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Describe on the identification and classification schemes of cloud (15mins)
- Discussion on cloud types based slide presentations and real time observation (15min)
- Suggest the solutions for student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;
- Q1. Amongst the 10 types of cloud, how can you identify rain-making cloud?
- Q2. Amongst the 10 types of cloud, which clouds can be classified under vertically developed cloud?
- Q3. Which clouds are associated with fair weather?
- Q4. Which cloud produce continuous rainfall and which one yield heavy shower with shorter duration.

**Assignment:**

- Write a short paragraph on cloud condensation nuclei (CCN)? Describe in brief about the formation of cloud?

**Reference:**

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Introduction</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	One

**Objectives:**

At the end of the topic, students will be able to:

- Describe some important cloud species.
- Explain the importance of cloud in the atmosphere.
- Write different processes and mechanisms involved in cloud formation.

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Describe some important cloud species through tables and figures in slides(10)
- Explain in brief importance of cloud in the atmospheric processes and the associate Earth's surface climate.(10min)
- Discussion on the basic mechanisms that are involved in cloud formation (5mins)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What are the different methods of cloud formation?  
Q2. What are the possible controls of cloud formation?

**Assignment: (2mins)**

- Write an essay on importance of cloud formation in earth atmospheric system?

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Fundamental concepts of thermodynamic</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Explain the importance of thermodynamics in cloud physics
- Describe the equation of state of dry air
- State and derive First law of thermodynamic.

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Describe the Equation of state of dry air (5)
- Step wise derivation First law of thermodynamic(20)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Derive the possible results for the following cases using first law of thermodynamics;  
(a) Isobaric process  
(b) Isothermal process  
(c) Isochoric process
- Cross check the results between students followed by teacher

**Assignment: (2mins)**

- What is potential temperature? Derive an expression  $\theta = T \left( \frac{1000\text{hPa}}{p} \right)^k$  using first law of thermodynamic under adiabatic process.

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Fundamental concepts of thermodynamic</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Write the definition and concept of entropy.
- Drive Second law of thermodynamic.
- Conceptualize the importance of 2<sup>nd</sup> law of thermodynamics and entropy in the atmosphere

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Describe Entropy & Second law of thermodynamic with step wise derivation (15min)
- Discussion on the importance of Entropy & Second law of thermodynamic in the atmospheric study (10min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Based on the figure provided (Figure 1.) give the reasons for the following questions.  
(a) Which system provides high energy photons?  
(b) Which system is responsible for the high entropy created in the atmosphere?  
Why?

**Assignment: (2mins)**

- Write a paragraph on “the atmosphere can be considered as a giant thermodynamic engine”
- Write briefly on the Isobaric and Adiabatic processes.

**Reference:**

- Liu et al.(2011);Understanding Atmospheric Behaviour in Terms of Entropy: A Review of Applications of the Second Law of Thermodynamics to Meteorology Iribarne, J. V., & Godson, W. L. (Eds.). (2012).

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Fundamental concepts of thermodynamic</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Identify and explain thermodynamic variables like;  
(a) Extensive and intensive variables,  
(b) Vapor pressure & saturation vapor pressure.
- Describe the concept of Claius-Clapeyron equation

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Discussion of different thermodynamics variables and concepts; (15min)  
(a)Atmospheric thermodynamic state, (b)Thermodynamic equilibrium, (c)Extensive and intensive variables, (d)Vapor pressure & Saturation vapor pressure, and others
- Discussion on Claius-Clapeyron equation (10min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Distinguish whether the following variables are extensive or intensive in natures:  
(i) Pressure, density, Specific entropy  
(ii) Equation of state  $p = \rho RT$
- What are open and closed systems? If there is no exchange of mass but immaterial exchange happens in the system, what type of system is it?
- Do you here about Intrinsic and extrinsic variables. What type of variable is terrestrial emission?

**Assignment: (2mins)**

- Write briefly on the Isobaric and Adiabatic processes.

**Reference:**

- Liou, K. N. (1992). Radiation and cloud processes in the atmosphere. Theory, observation, and modeling.

Lesson Plan – 07

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Thermodynamic processes involved in cloud and fog formation</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Explain the basic concept of cloud and fog formation.
- Conceptualize the Isobaric and Adiabatic cooling of moist air in the atmosphere.

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Discussion on the basic concepts on cloud and fog formation.(15mins)
- Theoretical description of Isobaric and Adiabatic processes involved in cooling of moist air in the atmosphere(10mins)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Can clouds be formed below the freezing level?
- Can you guess that either the isobaric or adiabatic processes can best describe the vertical development of cloud?

**Assignment: (2mins)**

- What do you mean by thermodynamic diagram? Describe any four the significant levels.

**Reference:**

- Seinfeld John H. and Pandis Spyros N., Atmospheric Chemistry and Physics from air pollution to climate change

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Thermodynamic processes involved in cloud and fog formation</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Describe the physics of Isobaric and Adiabatic cooling of moist air in the atmosphere
- Drive an relation that, dew-point temperature ( $T_d$ ) as a function of the prevailing ( $T_o$ ) and relative humidity(RH) in isobaric cooling process.
- Compute the equations for cloud condensation level ( $h_{LCL}$ ) and cloud condensation temperature ( $T_L$ )

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Describe Isobaric and Adiabatic processes involved in cooling of moist air with mathematical description. (15mins)
- Demonstrate the thermodynamic diagram to identify the significant levels (10min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Define (i) dew point temperature, (ii) Cloud condensation level
- What could be the dew point temperature at 850mb pressure if an air parcel has cooled isobarically at temperature of 5°C to reach 50% RH?
- Finding the cloud condensation level ( $h_{LCL}$ ) and cloud condensation temperature ( $T_L$ ) for the given sounding data/plot (Figure 2.).

**Assignment: (2mins)**

- If the air parcel is lifted beyond the  $h_{LCL}$  what could be the expression for lapse rate  $\Gamma_s$  in terms of latent heat of condensation ( $-H_s$ )?

**Reference:**

- Seinfeld John H. and Pandis Spyros N., Atmospheric Chemistry and Physics from air pollution to climate change

Lesson Plan – 09

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Thermodynamic processes involved in cloud and fog formation</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Describe the cooling with entrainment process in the atmosphere and cloud
- Explain some of the importance and effects of entrainment process
- Explain entrainment equation and cloud lapserate

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)

- Discussion on the general concept of entrainment process in the atmosphere and cloud in cooling of moist air.(10mins)
- Describe entrainment equation (5min)
- Teacher-student interaction on “the importance and effects of entrainment process” (10min)
- Discussion on student’s queries related to the topic (10mins)

**Evaluation: (8mins)**

- Define entrainment process
- Can you modify the cloud lapse rate with the introduction of entrainment process

**Assignment: (2mins)**

- What do you mean by the detrainment process? Describe how the entrainment is related to the RH.

**Reference:**

- Rooy et.al.,(2012); Review Article Entrainment and detrainment in cumulus convection: an overview

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>

<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Thermodynamic processes involved in cloud and fog formation</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Drive a mathematical relation of cloud formation

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Revise shortly the Adiabatic and Entrainment processes in cooling of the atmospheric moisture (5min)
- Describe the derivation processes and steps on ‘simplified mathematical description of cloud formation’(20min)
- Discussion on student’s queries related to the topic (10mins)

**Evaluation: (8mins)**

- Define entrainment process
- Modify the cloud lapse rate with the introduction of entrainment process

**Assignment: (2mins)**

- Does the entrainment process also alter in mixing ratio? If so, what could be the expression for the rate of change of water vapor mixing ratio within the air parcel, derive it.

<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Growth of cloud droplets</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Describe the important factors that determine the cloud droplet growth
- Write in detail about the growth of an individual cloud droplet by the diffusion of water vapor

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Describe different factors that determine the cloud droplet growth.(5mins)
- Describe in details about the growth of an individual cloud droplet by diffusional process with considering the vapor concentration and surface area method (20min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- How vapor concentration gradient and vapor pressure gradient exist in the atmosphere and what could be its impact in cooling process for creating favorable environment on cloud droplet growth.

**Assignment: (2mins)**

- Derive an expression for the growth rate of individual cloud droplet in term of mass or radius.

**Reference:**

- <https://journals.ametsoc.org/jas/article/24/6/688/17343/Cloud-Droplet-Growth-by-Collection>

<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Growth of cloud droplets</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

Describe the growth of an individual cloud droplet by Bergeron process and Collision and coalescence process

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Describe both the Bergeron process and Collision and coalescence process (10min)
- Teacher followed Student-Student interaction on the mechanism of “Bergeron process and Collision and coalescence process” (15min)
- Discussion on student’s queries related to the topic (10mins)

**Evaluation: (10mins)**

- Which process is most appropriate for droplet growth in shallow layer cloud?

**Assignment: (2mins)**

- How do you define droplets population? Which thermodynamic process is most dominant in droplets growth?

**Reference:**

- Zhang, B., Zhu, M., Wang, C., & Guan, X. (2012). Analysis of Cloud Droplets Growth and Phase Transition Radiation Process. *Energy Procedia*, 16, 1003-1008.

<b>Topic:</b>	<b>Growth of cloud droplets</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Two

**Objectives:**

At the end of the topic, students will be able to:

- Explain and write the theory of growth of droplets population
- Describe Cloud condensation nuclei (CCN) mathematically

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(5mins)
- Describe the theory of growth of droplets population in term of production (P) and condensation (c)(20mins)
- Describe Cloud condensation nuclei (CCN) mathematically (10min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Define cloud condensation nuclei (CCN)
- What are the sources of aerosols in the context of your region?

**Assignment: (2mins)**

- Drive the solution for a *thermodynamic va*  $Q_1$ .

<b>Topic:</b>	<b>Hydrometeors</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Three

**Objectives:**

At the end of the topic, students will be able to:

- Define hydrometeors
- Describe hydrometeors (liquid or solid) that are suspended in air
- Differentiate fog, haze and mist.

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Introduction on hydrometeors (5min)
- Discussion on formation and characteristics of suspended hydrometeors(20min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1.What difference could you expect between haze, mist and fog?  
Q2.What could be the necessary condition for the formation of ice-fog and radiation fog?

**Assignment: (2mins)**

- Choose a location which usually have foggy morning and collect the temperature and relative humidity data for one year. Analyzed such parameters and compare for foggy and clear day.

**Reference:**

<b>Topic:</b>	<b>Hydrometeors</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Three

**Objectives:**

At the end of the topic, students will be able to:

- Describe both solid and liquid types of precipitation
- Explain the necessary condition for freezing rain and formation of rime
- Distinguish the types of clouds in association with each hydrometeors

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Introduction on both solid and liquid form of hydrometeors that can reach the ground surface (15min)
- Description of hydrometeors that are associated cloud types (10min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What are snow pellets and how can you distinguish them from hail?  
Q2. What is diamond dust? How can you distinguish it in the atmosphere?

**Assignment: (2mins)**

- How the structure of snow crystal get formed? Describe the physical processes involved in such process.

**Reference:**

- <https://www.noaa.gov/stories/how-do-snowflakes-form-science-behind-snow#:~:text=A%3A%20A%20snowflake%20begins%20to,That's%20the%20short%20answer.>

<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Hydrometeors</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Three

**Objectives:**

At the end of the topic, students will be able to:

- Define severe storm and hail
- Conceptualize the life cycle of thunderstorm cells
- Visualize the basic thermodynamics of hail growth

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Introduction on severe storm and hail (5min)
- Description of the life cycle of thunderstorm cells (10min)
- Explanation on the basic thermodynamics of hail growth with thermodynamic diagram(10min )
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What could be the CAPE value for hail event (with the help of thermodynamic plot)?  
Q2. Find out the lapserate between 850–500 hPa and 500–300 hPa (in the given thermodynamic plot)??

**Assignment: (2mins)**

- Prepare the case study report on hail event (based on your choice).

<b>Topic:</b>	<b>Precipitation</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Four

**Objectives:**

At the end of the topic, students will be able to:

- Define precipitation
- Outline the necessary condition to release precipitation from any cloud
- Distinguish between the different types and forms of precipitation

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduce the necessary conditions of precipitation release from the cloud(10min)
- Discussion on different types and forms of precipitation (10min)
- Discussion on the precipitation measurement(5min)
- Address all the queries from students (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What causes precipitation to fall as freezing rain?  
Q2. What causes precipitation to fall as snow?

**Assignment: (2min)**

- Describe the role of precipitation to maintain water cycle?
- How can you predict for chance of rainfall with surface and upper air observation?

<b>Topic:</b>	<b>Precipitation theories</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Four

**Objectives:**

At the end of the topic, students will be able to:

- Explain about the Collision - Coalescence theory
- Explain the Ice-crystal theory

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction to the Collision-Coalescence theory and Ice-crystal theory for rain making (20min)
- Discussion on the importance of vapor pressure difference between water droplets and single ice crystal in making rain (5min)
- Address all the queries from students (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. Which theory you think is most appropriate for making snowfall? Why?

**Assignment: (2min)**

- How can you analyze rainfall anomalies if you have 30 years of observation?

<b>Topic:</b>	<b>Precipitation processes</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Four

**Objectives:**

At the end of the topic, students will be able to:

- Visualize the layer clouds
- Explain the physical processes responsible for the release of precipitation from layer clouds
- Sketch a schematic diagram of precipitation release process

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction to the layer clouds (5min)
- Description of the physical processes involved in precipitation release from layer clouds with diagram(20min)
- Address all the queries from students (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. Is Wegener-Bergeron process is responsible for the release of precipitation from stratiform (layered) clouds? Why was it important?

**Assignment: (2min)**

- Find some differences between the layer and shower clouds?

**Reference:**

- <https://link.springer.com/article/10.1007/BF02247277>

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Precipitation processes</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Four

**Objectives:**

At the end of the topic, students will be able to:

- Visualize the cumulus type or showers clouds
- Explain the physical processes responsible for the release of precipitation from showers clouds
- Sketch a schematic diagram of precipitation release process in shower cloud

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction to the shower/cumulus clouds (5min)
- Description of the physical processes involved in precipitation release from shower clouds with diagram(20min)
- Address all the queries from students (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. Which cloud produce heavy precipitation for a short duration? How?

**Assignment: (2min)**

- Find some differences between the precipitation release process from layer and shower clouds?

**Reference:**

- <https://link.springer.com/article/10.1007/BF02247277>

<b>Institute:</b>	Institute of Science and Technology, TU	<b>Date:</b>	
<b>Department:</b>	Central Department of Hydrology and Meteorology	<b>Time:</b>	
<b>Subject:</b>	Cloud Physics (Hymet-504)	<b>Full Marks:</b>	50
<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Mesoscale structure of rain</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Four

**Objectives:**

At the end of the topic, students will be able to:

- Describe the observation technique of cloud to study the microphysical characteristics
- Visualize the organization of precipitation around a cold front
- Conceptualize the vertical profile of (a) Richardson Number (b) potential temperature (c) wind shear and other parameters in the rain bearing clouds

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction to the mesoscale features of the clouds (5min)
- Description of the precipitation around a cold front (10min)
- Demonstration of various meteorological parameters with their vertical profiles(10min)
- Address all the queries from students (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What do you think about the existence of cold front mostly associated with rain shower? How?

**Assignment: (2min)**

- Describe briefly the distribution and structure of rainfall in a cyclone wave.

<b>Credit hrs:</b>	2 (30 Lecture hrs.)	<b>Level:</b>	M.Sc.1 <sup>st</sup> Sem.
<b>Topic:</b>	<b>Precipitation Efficiency of cloud</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Four

**Objectives:**

At the end of the topic, students will be able to:

- Conceptualize the clouds behaviors in the atmosphere
- Define and describe the precipitation efficiency of the clouds

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction to the clouds behaviors in atmosphere (10min)
- Description of the precipitation efficiency of cloud based on drop-size distribution and other parameters (15min)
- Address all the queries from students (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What causes the low precipitation efficiency of shower cloud?

**Assignment: (2min)**

- What do you think about the artificial modification of precipitation efficiency in cloud?  
Write your own views.

<b>Topic:</b>	<b>Artificial weather modification</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Five

**Objectives:**

At the end of the topic, students will be able to:

- Introduce the historical scheme of cloud modification (global practices)
- Identify the historical lacking in weather modification practices

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction on artificial weather modification (5mins)
- Introduction on various historical practices (global) on artificial weather modification (10mins)
- Interaction on major lacking on historical practices (10min)
- Suggest the solutions for student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What could be the economic benefits of artificial weather modification?  
Q2. Is there any negative impact of artificial weather modification?

**Assignment:**

- Conduct a social survey in your community and make short report on historical practices of rainmaking in your community. Also highlight lacking in such practice.

<b>Topic:</b>	<b>Artificial weather modification</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Five

**Objectives:**

At the end of the topic, students will be able to:

- Highlight the importance of artificial weather modification
- Define cloud seeding
- Explain the effectiveness of cloud seeding and controlling factors

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Discussion on importance and challenges of artificial weather modification (10mins)
- Introduction on cloud seeding (10mins)
- Suggest the solutions for student's queries related to the topic (10mins)

**Evaluation: (8mins**

- Ask questions to some selected students and evaluate their response;  
Q1. How the relative humidity (Moisture) and temperature within a cloud is important?

**Assignment:**

- Create an idea on “the artificial weather modification could enhance the recent climate change”.

**Reference:**

<b>Topic:</b>	<b>Artificial weather modification</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Five

**Objectives:**

At the end of the topic, students will be able to:

- Explain different types of cloud seeding
- Conceptualize different seeding methods

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction on types of cloud seeding (15mins)
- Introduction of different cloud seeding methods(10min)
- Suggest the solutions for student’s queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. What do you mean by Hygroscopic and Glaciogenic agents? Do you think about the feeding of direct water to the cloud become effective in rainmaking?

**Assignment:**

- Write a paragraph about your own ideas on “feasibility and effectiveness of aircraft seeding of cloud to enhance precipitation in Nepal”.

<b>Topic:</b>	<b>Artificial weather modification</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Five

**Objectives:**

At the end of the topic, students will be able to:

- Introduce both the warm and cold cloud
- Explain about the warm cloud seeding
- Create a diagram of warm cloud seeding

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Introduction on warm and cold cloud (5mins)
- Description on the warm cloud seeding (20min)
- Suggest the solutions for student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. Create a schematic diagram of warm cloud seeding?

**Assignment:**

- Explain how china in 2008 Olympic practice to stop rain?

**Reference:**

- <https://www.businessinsider.com/china-sets-aside-millions-to-control-the-rain-2016-7>

<b>Topic:</b>	<b>Artificial weather modification</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Five

**Objectives:**

At the end of the topic, students will be able to:

- Explain about the cold cloud seeding
- Create a diagram of cold cloud seeding
- Conceptualize on artificial cloud and fog dissipation

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feedback to the assignment(10mins)
- Description on the cold cloud seeding (15min)
- Introduction on cloud and fog dissipation (10min)
- Suggest the solutions for student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1. Create a schematic diagram of cold cloud seeding?

**Assignment:**

- How many countries are involved in cloud seeding practice? Describe the physics of fog dissipation and hail suppression with examples.

<b>Topic:</b>	<b>Microstructure of Clouds and Precipitation</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Six

**Objectives:**

At the end of the topic, students will be able to:

- Introduce the parameters that defines the microstructure of clouds
- Conceptualize on the different techniques to study the microstructure of clouds

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Introduction to the microstructure of cloud(15min)
- Description on the techniques used to study the microstructure of clouds (10min)
- Suggest the solutions for student’s queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1.How RADAR works on detecting droplets inside the clouds?

**Assignment: (2mins)**

- Describe the sensors that are equipped in aircraft for measurement of cloud microphysics.

**Objectives:**

At the end of the topic, students will be able to:

- Describe the relative humidity inside clouds and Fogs

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Introduction to the variation of relative humidity as temperature changes in vertical (10min)
- Explain the relative humidity inside clouds and Fogs with graph demonstration (15min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1.What could be the range of RH inside the cloud and fog?

**Assignment: (2mins)**

- Review the following papers and make a review report

**Reference:**

- Willett et al.,(2010); Willett, K. M., Jones, P. D., Thorne, P. W., & Gillett, N. P. (2010). A comparison of large scale changes in surface humidity over land in observations and CMIP3 general circulation models. *Environmental Research Letters*, 5(2), 025210.

<b>Topic:</b>	<b>Microstructure of Clouds and Precipitation</b>	<b>Period:</b>	First
<b>Instructor:</b>	Ram Hari Acharya	<b>Unit:</b>	Six

**Objectives:**

At the end of the topic, students will be able to:

- Introduce about the microstructure of cloud and fog
- Explain the drop size distribution in clouds and Fogs

**Resources:**

- Computer with internet facility and presentation slides, White board and marker

**Activities:**

- Attendance (5mins)
- Feed back to the assignment(10mins)
- Introduction to the microstructure of cloud and fog (10min)
- Detail description of the drop size distribution in clouds and Fogs (15min)
- Discussion on student's queries related to the topic (10mins)

**Evaluation: (8mins)**

- Ask questions to some selected students and evaluate their response;  
Q1.What could be the maximum and minimum drop size found to be distributed within a cloud?

Q1. What difference could you find in the droplets size as per the location?

**Assignment: (2mins)**

- Chose an event of foggy day in a surroundins surface station and analyze the following parameters

- (a) Relative humidity
- (b) Temperature
- (c) Wind speed
